

Child and Adolescent Well-Care Visits (WCV)

By working together, we can improve health outcomes for your patients, our members. The Healthcare Effectiveness Data and Information Set (HEDIS®) helps us measure many aspects of performance. This tip sheet provides key details of the HEDIS measure for a child and adolescent well-care visit.

What Is the Measure?

The measure focuses on members between the age of 3 and 21 years who had at least one comprehensive well-care visit with a primary care practitioner (PCP) or an obstetrician/gynecologist (OB/GYN) during the measurement year.

How to Improve Your Quality Score

- Code visits appropriately.
- Schedule the next appointment during new and subsequent visits.
- Provide the recommended vaccine schedule, if appropriate.

Note: Compliance is achieved with one or more reported comprehensive well-care visits with a PCP or OB/GYN during the measurement year.
